Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 May 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Objections

Claim 1 is objected to because of the following informalities: in line 11, "of a pair" seems out of place. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Arora, US No. 6,364,316 ("Arora").

Arora discloses a shaft seal mechanism (FIG. 4) constructed such that a plurality of thin plates (24) are arranged in an annular space between a rotor (15) and a stator (12) so as to form a thin plate assembly of an annular shape, said thin plates have their outer circumferential proximal end (FIG. 4) side supported to the side of said stator (FIG. 1) and their inner circumferential distal end side non-fixed to an outer circumferential surface of said rotor (15) so that said thin plate assembly of the annular shape divides said annular space between said rotor and said stator into a higher pressure side area and a lower pressure side area and the outer circumferential

Art Unit: 3676

proximal end side of each of said thin plates is pinched (via 32, i.e. clamping the assembly together) to be retained between thin plate retaining rings (20, 28), having a flexibility, of a pair.

The outer circumferential proximal end side of each of said thin plates is pinched to be retained between said thin plate retaining rings via a deviation preventing member (32) that regulates a motion (i.e. 32 fixes the seal assembly) of each of said thin plates relative to said thin plate retaining rings.

Allowable Subject Matter

Claims 3 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Enoch E Peavey whose telephone number is 305 1977. The examiner can normally be reached on Mon-Fri 8:00 am to 4:30 am.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Judy Swann can be reached on (703) 306-4115. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
